Digital Assignment Lab - 3

Course Name :- Agile Development Process and Devops Lab

Course code :- ISWE406P

Name :- Kommi Druthendra

Reg-No:- 23MIS0213

1-Create a Maven Project in Git

- Create a new Git repository

```
PS E:\> mkdir AGILE_LAB_DA_3

    Directory: E:\

Mode                 LastWriteTime         Length Name
----                 -------------         ------ ----
d-----          3/2/2026   8:29 PM                AGILE_LAB_DA_3

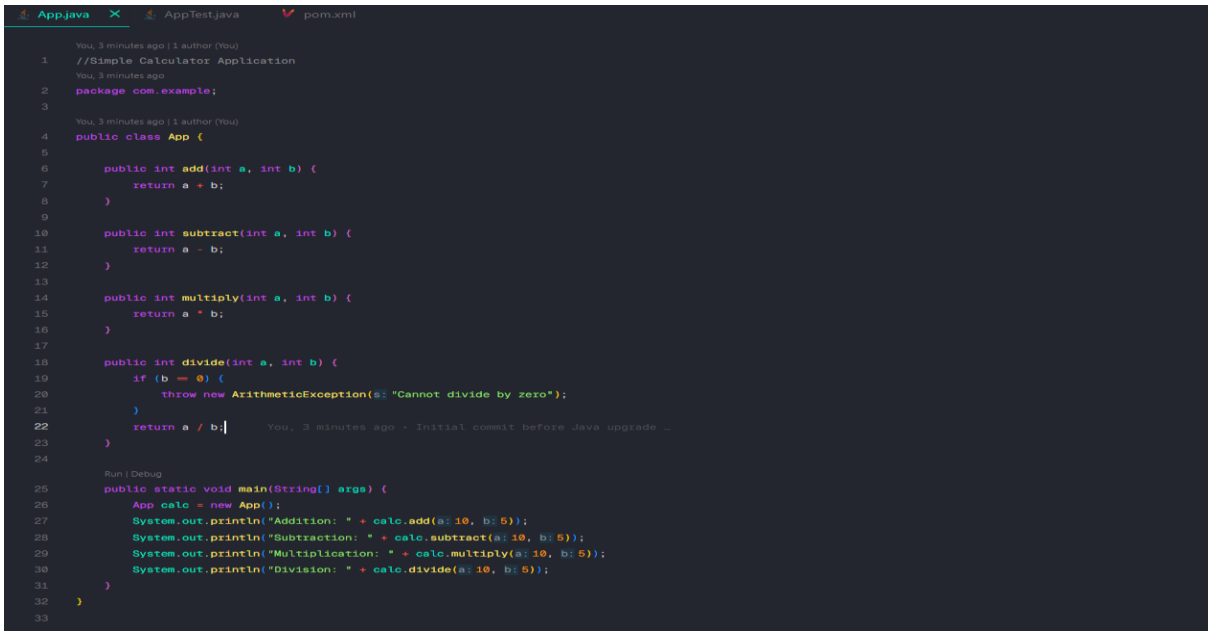
PS E:\> cd .\AGILE_LAB_DA_3\
PS E:\AGILE_LAB_DA_3> git init
Initialized empty Git repository in E:/AGILE_LAB_DA_3/.git/
PS E:\AGILE_LAB_DA_3>
```

- Create a simple Maven project structure manually, including the following files and folders:
  - pom.xml
  - src/main/java/com/example/App.java
  - src/test/java/com/example/AppTest.java

```
PS E:\AGILE_LAB_DA_3> tree /F
Folder PATH listing for volume ForgeZone
Volume serial number is D418-E8C0
E:.
│   pom.xml
└───src
    ├───main
    │   └───java
    │       └───com
    │           └───example
    │                   App.java
    │
    └───test
        └───java
            └───com
                └───example
                        AppTest.java
```

2-Implement the Java Program

- Write a simple Java program in App.java under your newly created Git repository for any one of the following scenarios:
  - Simple Calculator Application



```
//Simple Calculator Application

package com.example;

public class App {

    public int add(int a, int b) {

        return a + b;

    }

    public int subtract(int a, int b) {

        return a - b;

    }

    public int multiply(int a, int b) {

        return a * b;

    }
```

```
    public int divide(int a, int b) {
        if (b == 0) {
            throw new ArithmeticException("Cannot divide by
zero");
        }
        return a / b;
    }

    public static void main(String[] args) {
        App calc = new App();
        System.out.println("Addition: " + calc.add(10, 5));
        System.out.println("Subtraction: " + calc.subtract(10,
5));
        System.out.println("Multiplication: " +
calc.multiply(10, 5));
        System.out.println("Division: " + calc.divide(10, 5));
    }
}
```

- Write a corresponding unit test in AppTest.java.

```
App.java    AppTest.java    pom.xml
1   package com.example;
2
3   import org.junit.jupiter.api.Test;
4   import static org.junit.jupiter.api.Assertions.*;
5
6   public class AppTest {
7
8       App calculator = new App();
9
10      @Test
11      public void testAddition() {
12          assertEquals(15, calculator.add(a: 10, b: 5));
13      }
14
15      @Test
16      public void testSubtraction() {
17          assertEquals(5, calculator.subtract(a: 10, b: 5));
18      }
19
20      @Test
21      public void testMultiplication() {
22          assertEquals(50, calculator.multiply(a: 10, b: 5));
23      }
24
25      @Test
26      public void testDivision() {
27          assertEquals(2, calculator.divide(a: 10, b: 5));
28      }
29  }
```

```java
package com.example;

import org.junit.jupiter.api.Test;
import static org.junit.jupiter.api.Assertions.*;

public class AppTest {

    App calculator = new App();

    @Test
    public void testAddition() {
        assertEquals(15, calculator.add(10, 5));
    }

    @Test
    public void testSubtraction() {
        assertEquals(5, calculator.subtract(10, 5));
    }

    @Test
    public void testMultiplication() {
        assertEquals(50, calculator.multiply(10, 5));
    }

    @Test
    public void testDivision() {
        assertEquals(2, calculator.divide(10, 5));
    }
}
```

```
App.java    AppTest.java    pom.xml

```

4- Build the Maven Project

- Use Maven commands in Visual Studio Code terminal to:
    - Compile the project

Command Used:- mvn compile

```
PS E:\AGILE_LAB_DA_3> mvn compile

```

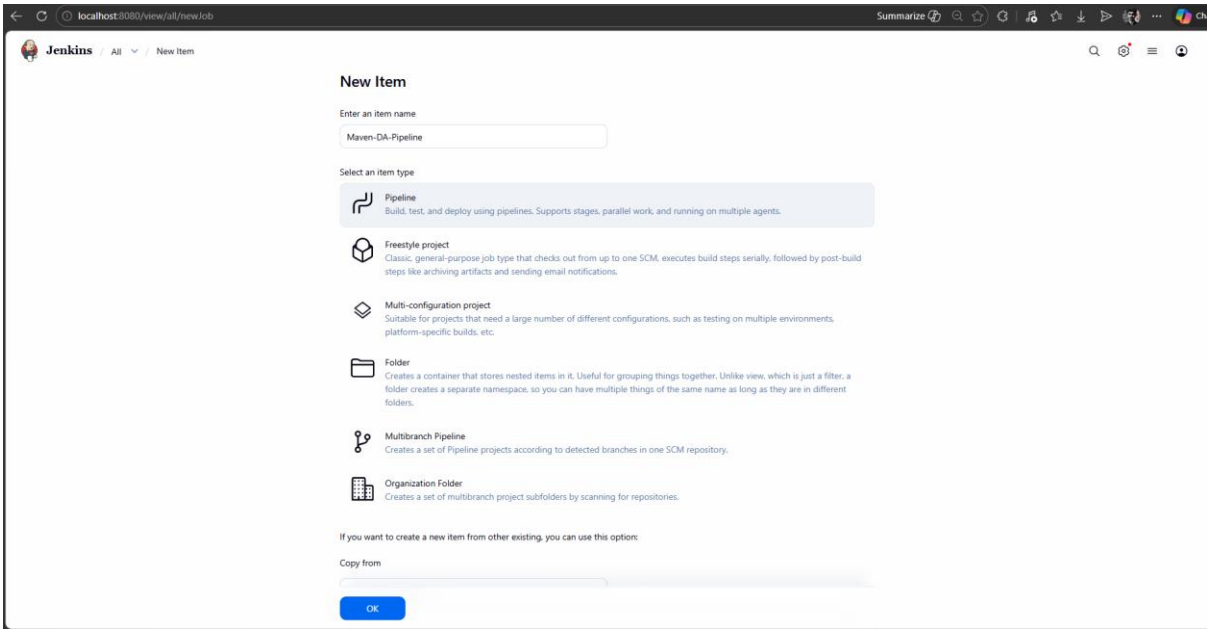
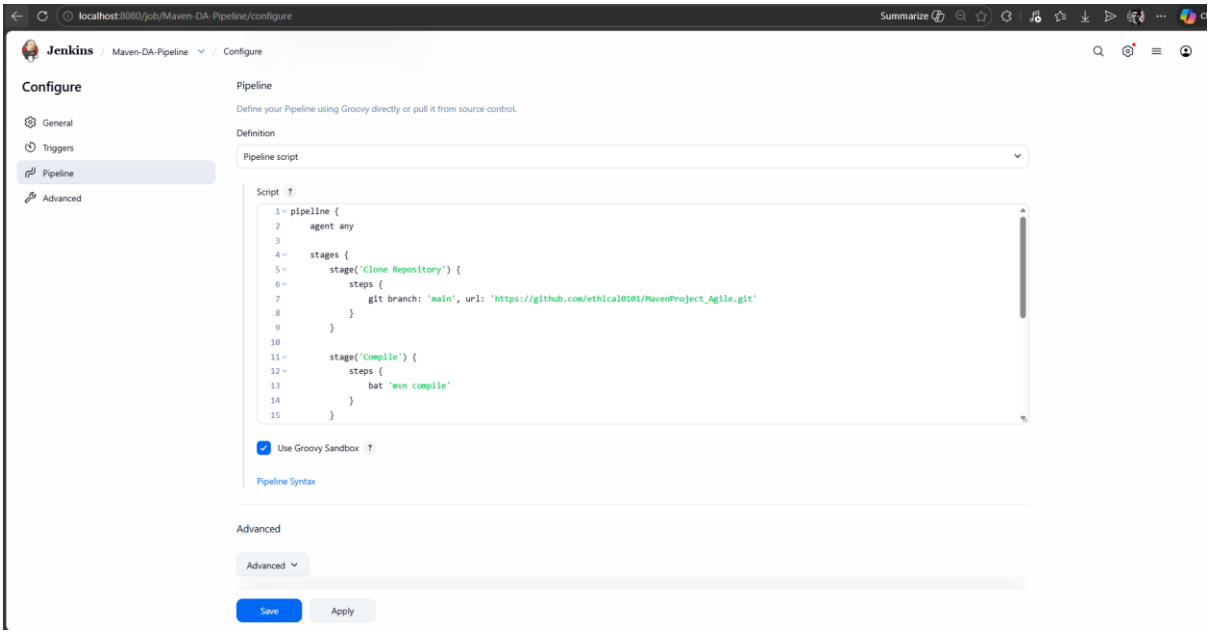
5-Create and Run Jenkins Pipeline

- Create a new Pipeline project in Jenkins.



- Create a pipeline script



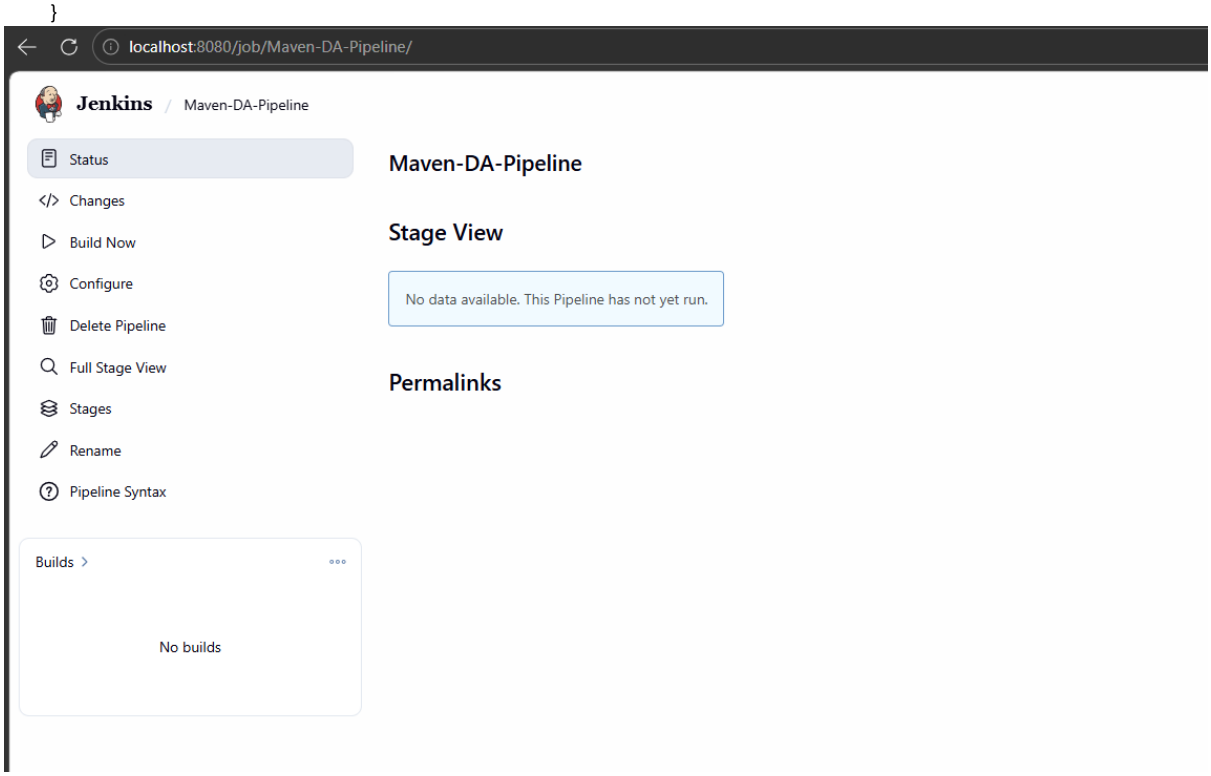
```
pipeline {
  agent any

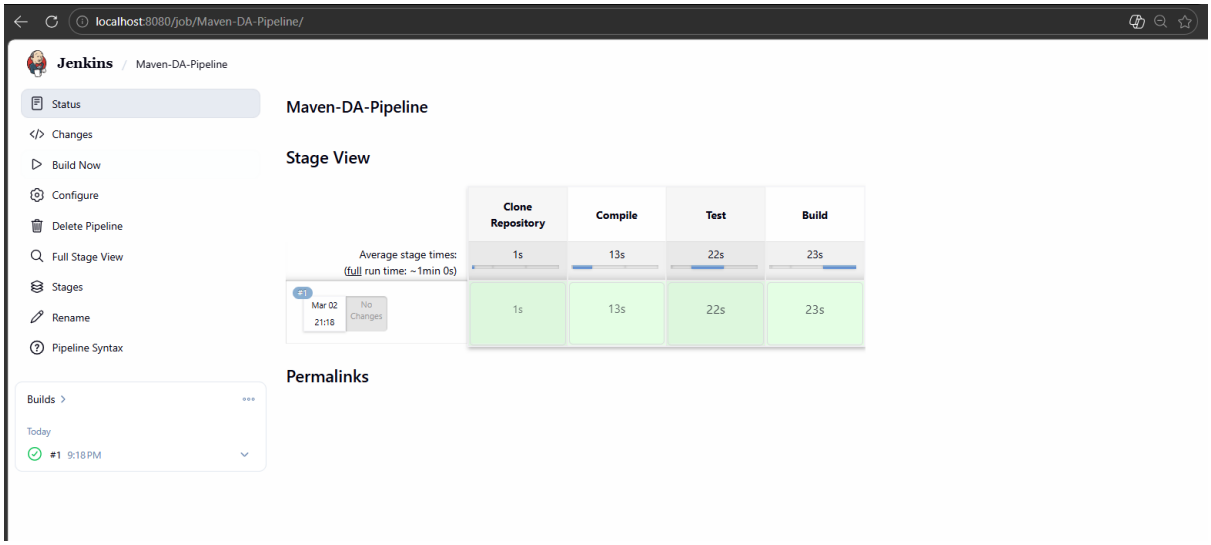
  stages {
    stage('Clone Repository') {
      steps {
        git branch: 'main', url: 'https://github.com/ethical0101/MavenProject_Agile.git'
      }
    }

    stage('Compile') {
      steps {
        bat 'mvn compile'
      }
    }
```

```
        stage('Test') {
          steps {
            bat 'mvn test'
          }
        }

        stage('Build') {
          steps {
            bat 'mvn clean install'
          }
        }
      }
    }
```





- Execute the pipeline and verify successful build completion.
